

A FIELD PROJECT REPORT ON

THE UNSERIOUS GENERATION ON THE MOST SERIOUS TOPIC:
IRONY, HUMOR AND GEN Z LANGUAGE AS POLITICAL RESISTANCE
IN THE NEET-UG 2026 PROTESTS

Submitted in partial fulfilment of the requirements for the
Second Year Bachelor of Arts (S.Y.B.A.) — English Literature

Submitted by
Gatha Kalpana Vijay

Under the guidance of
Prof. Dr. Umesh Jagdale
Department of English

Sangamner Nagarpalika Arts, D.J. Malpani Commerce and B.N. Sarda Science
College (Autonomous), Sangamner
Affiliated to Savitribai Phule Pune University

Academic Year 2026–27
Year of Submission: 2026

CERTIFICATE

Sangamner Nagarpalika Arts, D.J. Malpani Commerce and B.N. Sarda Science
College (Autonomous), Sangamner

This is to certify that **Gatha Kalpana Vijay**, a student of S.Y.B.A. (English Literature), has satisfactorily completed the Field Project entitled **“The Unserious Generation on the Most Serious Topic: Irony, Humor and Gen Z Language as Political Resistance in the NEET-UG 2026 Protests”** under my guidance and supervision during the academic year 2026–27.

To the best of my knowledge, this work is the original work of the student and has not been submitted earlier to this or any other university or institution for the award of any degree, diploma or certificate.

Place: Sangamner

Date: ____ / ____ / 2026

Project Guide
Prof. Dr. Umesh Jagdale

Head of Department
Department of English

Principal
(Seal of the College)

CERTIFICATE OF ORGANISATION

Not Applicable.

The present Field Project is a desk-based qualitative study of publicly available digital material (protest posters and photographs circulated on Instagram and Pinterest). The study was not carried out within, or on behalf of, any host organisation, and therefore no certificate from an organisation is attached.

SELF-DECLARATION

I, **Gatha Kalpana Vijay**, a student of S.Y.B.A. (English Literature), Sangamner Nagarpalika Arts, D.J. Malpani Commerce and B.N. Sarda Science College (Autonomous), Sangamner, hereby declare that the Field Project Report entitled “**The Unserious Generation on the Most Serious Topic: Irony, Humor and Gen Z Language as Political Resistance in the NEET-UG 2026 Protests**” is my own original work, carried out under the guidance of **Prof. Dr. Umesh Jagdale**, Department of English.

I further declare that this report has not been submitted, either in part or in full, to any other university or institution for the award of any degree, diploma or certificate. All photographs and posters reproduced in this report are the work of their respective creators and have been credited to their original sources; all secondary sources consulted have been duly acknowledged in the References.

Place: Sangamner

Date: ____ / ____ / 2026

Gatha Kalpana Vijay
S.Y.B.A. (English Literature)

ACKNOWLEDGEMENTS

I would like to thank my guide, **Prof. Dr. Umesh Jagdale Sir**, for guiding me throughout this field project. His suggestions during the progress report presentation helped me figure out what exactly my research question was, and gave this project a proper direction.

I am also thankful to the Principal and the Head of the Department of English, Sangamner Nagarpalika Arts, D.J. Malpani Commerce and B.N. Sarda Science College (Autonomous), Sangamner, for giving me the opportunity to work on this project, and to all the teachers of the English department for their support.

A special thanks to all the protestors, students, independent journalists and creators whose posters, photographs and posts became the data for this project. This project exists because of their creativity— all of their work has been credited to the original sources.

Lastly, thank you to my family and friends for their support, and for tolerating me sending them protest memes at 2 a.m. and calling it ‘research’.

Gatha Kalpana Vijay

CHAPTER 1

INTRODUCTION AND RESEARCH METHODOLOGY

1.1 Introduction

When Gen Z of India swarmed the streets of Jantar Mantar, New Delhi, and various parts of India— protesting over NEET-UG paper leaks and failure of the Indian education system— they carried posters quoting Spider-Man, demanding accountability from the government. Their primary focus targeted the recurring failures and irregularities of the Indian education system, including paper leaks and youth unemployment. They demanded the resignation of the Union Education Minister to hold the government accountable. They also demanded compensation and relief for the families of the students who lost their lives by suicide due to exam turmoil. Six student activists from All India Students' Association (AISA), along with education activist Sonam Wangchuk, went on an indefinite hunger strike.

Amidst the protest, Gen Z didn't just march— they memed. They showed up unserious while being serious at the same time. The relatable, trending brainrot memes, quotes, slang, and reels were used to protest and put forth their demands. They used their creativity to connect the protest and brainrot memes they've seen all their life. Unlike the 'traditional' protests that have happened so far, Gen Z showed up as they are — full of humor, satire, sarcasm, rage, and wisdom. The use of informal language, satire, dark humor, viral reel dances, brainrot memes, and pop culture references fueled the protest. It was an understanding so far that protests can only be done through formal language, political leaders, and mainstream media— Gen Z broke another stereotype, yet again. Even for the Union, the opposition, and everyone around, this was totally out of syllabus. Therefore, this new-age, unique, humorous, and full-of-satire language of Gen Z needs to be studied.

The research question this project ought to study is 'What made irony and humor an effective register for political resistance in the NEET-UG 2026 protests, rather than undermining the protest's seriousness?' The memes/reels/slangs/language of Gen Z functioned as a rhetorical mode of political resistance, not decoration around the protest. 'The unserious generation on the most serious topic'.

1.2 Statement of the Research Problem

Humor and protest are usually not seen together. A poster quoting a cartoon or a superhero film can easily be called childish or 'unserious'— and that is exactly how Gen Z gets dismissed most of the time. But during the NEET-UG 2026 protests, these were the posters people remembered, shared and reposted the most. So the question is—

how does something that looks so unserious end up carrying one of the most serious demands a generation can make? That is the problem this project tries to understand.

1.3 Research Question

What made irony and humor an effective register for political resistance in the NEET-UG 2026 protests, rather than undermining the protest's seriousness?

1.4 Thesis Statement

The memes, reels, slang and language of Gen Z functioned as a rhetorical mode of political resistance, not decoration around the protest. The humor was the method, not a distraction from it— ‘the unserious generation on the most serious topic’.

1.5 Objectives of the Study

1. To collect and document the protest language— posters, memes and slang— used by Gen Z during the NEET-UG 2026 protests.
2. To identify the rhetorical devices used in them, like irony, satire, parody, intertextuality, wordplay and slang.
3. To find out which institutional failure each item targets.
4. To understand who each item is speaking to— the in-group (Gen Z) and the out-group (government, elders, media).
5. To explain what humor allowed the protestors to say that formal protest language couldn't, and to help non-Gen Z generations understand this new-age language of Gen Z.

1.6 Research Design and Approach

This is a qualitative and interpretive study. The method used is multimodal discourse analysis— which basically means reading the image and the words of a poster together, as one message, instead of reading them separately. The framework is adapted from Hakoköngäs, Halmesvaara, and Sakki (2020), which is explained in detail in Chapter 2. Their three dimensions— content, form and rhetorical function— have been adapted in this project into four dimensions, shown in Table 1.1.

Every item analysed in this project has been analysed along these four dimensions: rhetorical device, institutional failure it targets, its implied audience, and its function within the broader protest discourse. Satire, irony, absurdism, parody, and meme-format literacy have been key rhetorical devices when analyzing the various items used as data. Each meme, each slang term, each ‘unserious’ reel has been used to target the institutional failure to demand accountability.

Table 1.1. Four dimensions used to analyse each item

Dimension	Question asked
1. Rhetorical device	Which device is doing the work— irony, satire, parody, intertextuality, wordplay, absurdism, slang?
2. Institutional target	Which institutional failure is it pointing at?
3. Implied audience	Who is supposed to ‘get it’ (in-group) and who is left outside the joke (out-group)?
4. Function	Why did it work— what did the humor let it say that formal protest language couldn’t?

1.7 Sampling Strategy and Sample Size

The corpus for this project consists of 7 items collected from various platforms such as Instagram feeds of protestors, independent journalists, and influencers who visited the protest. Another source used to collect the corpus is Pinterest. The photographs and slang are between June 6, 2026, and July 25, 2026. Each item is unique, but together they tie back to the single objective of accountability and justice. Items were selected based on their rhetorical richness— prioritizing content that was highly shared, creatively distinct, especially illustrative of specific devices (satire, absurdism, irony, parody, etc.), or relatable to Gen Z.

This means the sampling is purposive— items were picked on purpose, for what they could show, and not randomly. The corpus was kept to **7 posters** (Figures 1–7) so that each one could be analysed properly, in depth, within the word limit of the project. These seven were chosen because together they cover a wide range of rhetorical devices — intertextuality, irony, parody, wordplay, comparative satire, slang reclamation and dark humor. All seven are listed with their sources in Appendix A.

1.8 Data Collection Methods

The data used in this project is secondary data— all of it was already publicly posted online. The 7 posters were collected from:

- Instagram— 2 posters, from the feeds of protestors, independent journalists and influencers who visited the protest.
- Pinterest— 5 posters, from boards where protest photographs were saved and reshared.

For every item, the account it was taken from was noted down so that it could be credited properly. Along with this, the article by Hakoköngäs, Halmesvaara, and Sakki (2020) and some books on memes, humor and resistance were read to build the theoretical background.

1.9 Scope and Limitations

- The corpus is small— 7 posters— so the findings are based on these seven.
- The project only looks at posters, memes and slang between June 6 and July 25, 2026. Speeches, chants and reels have not been analysed in depth.
- Since the items were chosen on purpose and the number is small, the findings can't be generalised to every single post from the protest.
- The movement is very recent, so there is almost no academic writing on it yet.
- Posts on social media get reposted a lot, so the account credited may sometimes be the one who shared it and not the one who made it.

1.10 Chapter Scheme

Chapter 1 introduces the topic, the research question and the methodology. Chapter 2 covers the theoretical background and the literature review. Chapter 3 gives the profile of the study context— the NEET-UG exam, the NTA and the protest itself, since this project is not attached to any organisation. Chapter 4 is the analysis of the seven items along with tables and graphs. Chapter 5 gives the findings, conclusion and suggestions.

CHAPTER 2

THEORETICAL BACKGROUND AND REVIEW OF LITERATURE

2.1 Theoretical Background

Before getting into the literature review, a few ideas need to be explained because they come up again and again in the analysis.

Memes

Limor Shifman (2014) describes internet memes as digital items that share common content, form and stance, and that are created, copied and changed by many users. In simple words— a meme isn't one joke, it's a format everyone already knows and anyone can join in on. Ryan M. Milner (2016) calls this 'participatory', and that is exactly what happened in the protests: anyone who knew the format could make a poster.

Multimodality

Gunther Kress and Theo van Leeuwen (2006) argue that images, colour, layout and fonts carry meaning just like words do. So a protest poster isn't only its text— the handwriting, the red colour of an 'error' message, a printed cartoon character, all of it is part of what it is saying. Multimodal discourse analysis reads all of these together (Kress, 2012).

Intertextuality and Parody

Intertextuality, a term given by Julia Kristeva, means that every text is built out of other texts. Linda Hutcheon (1985) describes parody as 'repetition with critical difference'— something familiar is repeated, but turned around to criticise. When a protestor rewrites Spider-Man's line or Dora's question, this is exactly what is happening.

Irony

Hutcheon (1994) says irony has an 'edge'— it says one thing and means another, and in doing so it separates the people who get it from the people who don't. This is why so many of the posters in this project have a dual-layered audience: an in-group that gets the joke instantly, and an out-group that is left outside it.

Humor as Resistance

Humor being used against power isn't new. Mikhail Bakhtin (1984) wrote about the 'carnavalesque'— moments where laughter turns the official world upside down and makes authority look ridiculous. James C. Scott (1990) showed how people with less power use jokes and disguised speech as a kind of weapon, because it is hard to punish someone for 'just a joke'. Majken Jul Sørensen (2016), who studied humor in political

activism, found that it helps activists get attention, build solidarity and weaken the authority of those in power. So humor and resistance aren't opposites— humor can be one of the strongest forms of resistance.

2.2 Review of Literature

Multimodal discourse analysis provides the primary methodological foundation for this project. Hakoköngäs, Halmesvaara, and Sakki (2020) applied this framework to analyze 426 internet memes posted by two far-right Finnish groups, arguing that memes function as a distinct mode of political communication— not mere images, but persuasive tools that combine visual and textual elements to construct ideological meaning. Their study examined memes along three dimensions— 1. Content (thematic categories), 2. Form (visual composition, colour, font), and 3. Rhetorical function (the persuasive work each meme performs). They found that irony and humor were deliberately used to crystallize arguments into an easily shareable form, building in-group solidarity while delegitimizing opponents.

Their study focuses on far-right nationalist rhetoric, this project adapts the same multimodal, three layer method to a very different context— analyzing how Gen Z used irony and humor not to entrench extremist ideology but to sustain a youth-led protest against institutional failure. No existing literature has yet applied this framework to the NEET-UG 2026 Gen Z protests, as the movement is recent enough that academic scholarship has not caught up— this project fills the gap by extending an established method to a new, unstudied case, while helping non-Gen Z generations to understand the new-age language of Gen Z.

2.3 Research Gap

Most of the existing work on memes and politics is about Western countries, election campaigns, or extremist groups like the ones Hakoköngäs and others studied. There is hardly anything on Indian student movements, and even less on the way Indian Gen Z actually talks— a mix of English, Hindi, Hinglish, internet slang and global pop culture. And on the NEET-UG 2026 protests specifically, there is no academic work at all yet. That is the gap this project tries to fill.

CHAPTER 3

PROFILE OF THE STUDY CONTEXT

Since this project is not done with or for any organisation, this chapter gives the profile of the context instead— the exam, the agency responsible for it, and the protest itself.

3.1 The NEET-UG Exam

NEET-UG (National Eligibility cum Entrance Test– Undergraduate) is the one national entrance exam for getting into undergraduate medical courses in India, like MBBS, BDS and AYUSH courses. More than twenty lakh students write it every year. For most of these students it means years of preparation, coaching fees, and a huge amount of pressure from themselves and their families— which is why a paper leak isn't just an 'irregularity', it messes with lakhs of lives at once.

3.2 The National Testing Agency (NTA)

The National Testing Agency is the body set up under the Ministry of Education, Government of India, to conduct big entrance exams including NEET-UG. Since the NTA is responsible for setting the paper, conducting the exam and keeping it secure, it became— along with the Union Ministry of Education— the main target of the protests after the leak.

3.3 The NEET-UG 2026 Protests

After the NEET-UG 2026 paper leak, students all over India came out to demand accountability. Their main demands were— accountability for the leak and for the repeated failures of the education system, the resignation of the Union Education Minister, and compensation and relief for the families of students who died by suicide because of the exam turmoil. The demonstrations at Jantar Mantar were led by the Cockroach Janta Party (CJP) along with various student groups, including the All India Students' Association (AISA). Even the name of the group leading the protest is satire — which says a lot about the tone of this whole movement.

Key Dates and Timeline

Table 3.1. Key dates and timeline of the protests

Date	What happened
June 6, 2026	Physical demonstration began at Jantar Mantar, New Delhi, led by Cockroach Janta Party (CJP) and various student groups for demanding accountability and education minister's resignation.
June 28, 2026	Activist Sonam Wangchuk joined the Jantar Mantar protest and began his indefinite hunger strike.
July 18, 2026	Police removed a weakened Sonam Wangchuk from the protest site.

Date	What happened
July 20, 2026	The ‘Sansad Chalo’— March to Parliament took place in New Delhi— resulting in violent clashes with security forces and student brutality.
July 23, 2026	Protests expanded into a nationwide agitation across multiple states such as Tamil Nadu and Kerala.
July 25, 2026	Union Education Minister ‘Dharmendra Pradhan’ resigned from his education minister position.

3.4 Gen Z— the Generation Protesting

Gen Z is roughly everyone born between the late 1990s and the early 2010s— the first generation that has grown up completely online. Our everyday language comes from Instagram reels, Pinterest boards, memes, Marvel movies, Hindi-dubbed cartoons, Blinkit, and slang like ‘baddie’, ‘brainrot’ and ‘404’. Almost every NEET-UG aspirant belongs to this generation. So when they protested, it only made sense that they protested in the language they know best— and that language spread online just as fast as it did on the streets.

CHAPTER 4

DATA ANALYSIS AND INTERPRETATION

4.1 Introduction

This chapter analyses the 7 posters that make up the corpus of this project (Figures 1–7). Each one is analysed using the four dimensions from Chapter 1— rhetorical device, institutional target, implied audience and function. After the seven analyses, the findings are put into tables and graphs to see what patterns come up.

4.2 The Corpus

Table 4.1. Posters in the corpus, by platform

Platform	No. of posters	Percentage
Pinterest	5	71.4%
Instagram	2	28.6%
Total	7	100%

Graph 1. Posters in the corpus, by platform

Most of the posters— 5 out of 7— came from Pinterest. That itself is interesting, because Pinterest isn't a news app. It's where people save outfits, aesthetics and mood boards. Protest posters being saved and reshared right next to all that shows that for Gen Z, the protest wasn't something separate from everyday online life— it became a part of it.

4.3 Analysis— Worked Examples

Figure 1. Quoting famous dialogue of Spider-Man from the Marvel Universe

Source: Instagram @p9xrider and @p9x_puneet_saxena

A protester is wearing a Spider-Man mask while holding a handwritten poster that says, *‘With great power comes great responsibility. Can’t say the same for the Indian Government.’* This is intertextuality— borrowing a globally recognized line from the pop-culture franchise (Avengers Multiverse and superheroes). Working through irony, since the original Spider-Man line is an earnest moral lesson about responsibility and accountability that comes with having power; here it’s flipped into an accusation. It is also a form of parody, since the government is being cast as a superhero who has the power but has failed to live up to the responsibility the power demands. It targets the government’s failure to act responsibly despite holding power over education policy— especially the mishandling and negligence behind the NEET-UG paper leaks. The poster doesn’t argue policy details; it makes a moral accusation using a maxim everyone already knows. The implied audience for this is dual-layered. First, the in-group being the Gen Zs— raised on Marvel films; thus the reference lands instantly without needing any explanation, which builds cultural fluency and solidarity amongst the protestors. Second, the out-group being the government officials, older generations, mainstream media— the reference may not even register the same way, which itself marks a generational and cultural gap between protestors and the institutions they’re criticizing.

The poster compresses a complex critique— a government has power without accountability— into a single, instantly legible, highly relatable, and shareable line.

Formal protest language (slogans, official statements, petitions) has to stay measured and defensible— it can’t openly mock authority without risking being dismissed as disrespectful or ‘illegitimate’. A meme sidesteps this entirely. By routing the accusation through Spider-Man, the protester makes the same claim— *the government has failed its basic responsibility*— but wrapped in something ‘just a joke’,

which makes it harder for censors, easier to share, relatable to almost every Gen Z, and lower-risk for the person posting it. Humor also lowers the barrier to participation; you don't need policy expertise to make or share a meme, so it turns outrage into something anyone can contribute to instantly. That's what formal language structurally can't do—it can state a grievance, but it can't spread virally, build in-group belonging through shared laughter, and be simultaneously deniable and cutting.

Figure 2. Wordplay—the institution's own name as the punchline

Source: Instagram @chief.of.shitposting

A protester holds a handwritten poster that reads, 'The 2 things missing in Education System is EDUCATION & SYSTEM.' The poster is built like a riddle—it sets up a question (what is missing?) and delivers a punchline that is simply the name of the institution itself. This is wordplay working through structural irony; the very words that are supposed to describe the institution become the accusation against it. It targets the total failure of the education system—not one paper leak, but a system that has become hollow at its core, where neither real education nor a functioning system remains. The implied audience is again dual-layered. The in-group, Gen Z, instantly recognizes the 'two things' riddle format from memes and reels, and the punchline lands without explanation. The out-group—officials and older generations—cannot easily dismiss it, because the joke is not an exaggeration; it is literally the complaint.

The poster compresses a sweeping critique of an entire institution into a single, self-evident line.

Formal protest language would need statistics, reports, and long arguments to claim that the education system has collapsed. The joke does it in eleven words. By turning the institution's own name against it, the poster makes the accusation impossible to argue with—while still being 'just a joke.'

Figure 3. Comparing the government to quick-commerce delivery apps

Source: Pinterest @yaashnaaaa

A black placard held up in the crowd reads, ‘*Even Blinkit & Flipkart are faster than your answers.*’ This is comparative satire combined with intertextuality from consumer culture— Blinkit (10-minute grocery delivery) and Flipkart are apps Gen Z uses every day. The government is being compared, unfavourably, to a delivery app. It targets the delay and silence of the government and the National Testing Agency in answering students after the NEET-UG paper leak— while lakhs of students waited for clarity, no answers came. The implied audience is urban Gen Z, who live on quick-commerce apps and instantly understand the comparison; for the out-group, the comparison exposes how slow and distant the institution looks to the generation it serves.

The poster measures state accountability against the speed Gen Z expects from everyday life, and in that comparison, official delay begins to look absurd.

Formal language could only say ‘the government has not responded in time.’ The meme makes that delay feel ridiculous. A grocery app reaching your door in ten minutes while a national exam body cannot answer in weeks— the absurdity itself becomes the argument.

Figure 4. Reclaiming Gen Z slang— ‘Baddies are not apolitical’

Source: Pinterest @Lyaaa

A protester holds up a handwritten poster that says, ‘*BADDIES ARE NOT APOLITICAL.*’ ‘Baddie’ is Gen Z slang for a confident, stylish young woman— a word usually associated with selfies, fashion, and Instagram aesthetics rather than politics. This is slang reclamation and the subversion of a stereotype. The poster targets the assumption that Gen Z, especially young women, are unserious, apolitical, and only interested in social media— an assumption that institutions rely on to ignore youth anger. The in-group self-identifies with the label proudly; the out-group (elders, media, politicians) is forced to revise its stereotype.

The poster is an identity declaration— it takes the very label used to dismiss Gen Z as ‘unserious’ and turns it into a political stance. In many ways, it is the thesis of this project written on a poster: the unserious generation on the most serious topic.

Formal protest language would have said ‘young women are politically aware.’ The slang version says it in the language of the people it describes, which makes it both a statement and a form of belonging— being a ‘baddie’ and being political are no longer opposites.

Figure 5. ‘Error 404’— borrowing the language of a broken web page

Source: Pinterest @FAGUN

A protester holds a poster that reads ‘error 404’ in red, followed by ‘accountability not found.’ This is internet and tech intertextuality— the HTTP 404 error is the page every internet user sees when a link is broken, or the page they are looking for does not exist. It works through deadpan irony; the poster does not shout, it simply ‘reports an error.’ It targets the absence of accountability— no minister, no agency, no official taking responsibility for the NEET-UG paper leak. For the in-group, digitally native Gen Z, ‘404’ is read instantly. For the out-group, the reference may not register at all, which once again marks the generational and cultural gap between protestors and the institutions they’re criticizing.

The poster frames the government as a broken website— students are searching for accountability, and the page simply does not exist.

Formal protest language would say ‘the authorities have failed to take responsibility.’ The 404 joke turns that into something visual, compact, and instantly shareable, using the red ‘error’ colour itself as part of the message.

Figure 6. Parody of Dora the Explorer’s question to the audience

Source: Pinterest @mydearnikes

A protester holds a printed poster of Dora the Explorer, with the line, '*Kya aapko kahi accountability dikh rahi hai?*' (Do you see accountability anywhere?). This is a parody of Dora's famous question to the audience from the Hindi-dubbed version of the cartoon, mixed with childhood nostalgia and Hinglish. It targets invisible accountability — the government's evasion after the NEET-UG leak. The implied audience is Gen Z who grew up watching Hindi-dubbed Dora on television; the call-and-response format pulls the viewer into answering the question, just like the cartoon did.

The poster turns the audience into participants. The obvious answer, 'No!', is the protest itself— and it treats the government's evasions like a children's game, where even a child can see what is missing.

Formal language can state a demand, but it can't make the audience say the answer out loud. By borrowing a cartoon every Gen Z remembers, the poster turns a political question into a shared memory, and the shared memory into solidarity.

Figure 7. Pun on 'leak'— parody of sanitary pad advertisements

Source: Pinterest @Spring potato

A protester in the crowd holds a handwritten poster that reads, '*MY PAD GOT BETTER LEAK PROTECTION THAN EDUCATION SYSTEM.*' This is a pun on the word 'leak'— a parody of sanitary pad advertisements that promise 'leak protection,' placed beside the NEET-UG paper leak. It is also dark humor that breaks the taboo around menstruation by bringing it into a public protest. It targets the paper leak and the complete failure of exam security. The in-group, especially young women, instantly gets the joke; the out-group is jolted— both by the comparison and by a taboo subject being made public.

Shock combined with humor makes the poster unforgettable— an everyday product outperforms a national system.

Formal protest language could never make this comparison; it would be considered ‘improper.’ That is exactly why it works— the poster says the education system is so broken that a sanitary pad is more reliable, and it says it in a way no one can unsee.

4.4 Data in Tables and Graphs

After analysing the seven items, the main points of each analysis were put into a table so they could be compared side by side.

Table 4.2. Summary of the seven analysed items

Fig.	Item	Rhetorical device	Institutional target	Implied audience
1	Spider-Man quote	Intertextuality, irony, parody	Power without accountability	Gen Z raised on Marvel vs. officials, elders, media
2	‘Education & System’	Wordplay, structural irony	Total failure of the education system	Gen Z who know the riddle format vs. officials, elders
3	Blinkit & Flipkart	Comparative satire, intertextuality	Delay and silence of Govt./NTA	Urban Gen Z on quick-commerce apps
4	‘Baddies are not apolitical’	Slang reclamation	Stereotype of apolitical youth	Young women vs. elders, media, politicians
5	‘Error 404’	Tech intertextuality, deadpan irony	Absence of accountability	Digitally native Gen Z vs. out-group
6	Dora the Explorer	Parody, nostalgia, Hinglish	Invisible accountability	Gen Z who grew up on Hindi-dubbed Dora
7	Pad ‘leak protection’	Pun, parody, dark humor	Paper leak and exam security	Young women; out-group is jolted

Table 4.3. How often each rhetorical device was used

Rhetorical device	No. of items (out of 7)	Figures
Intertextuality	3	1, 3, 5
Irony	3	1, 2, 5
Parody	3	1, 6, 7
Wordplay / pun	2	2, 7
Comparative satire	1	3
Slang reclamation	1	4
Dark humor	1	7

Most posters use more than one device, so the total is more than 7.

Graph 2. Rhetorical devices used in the seven analysed items

Intertextuality, irony and parody come out on top, used in three items each. What this shows is that most of the humor came from borrowing— Spider-Man, Dora, Blinkit, a 404 page, a pad ad. Gen Z didn't need to invent new symbols for the protest. They took things everyone already knew and turned them against the government, and because everyone already knew them, the joke landed instantly.

Graph 3. What each analysed item was targeting

On the surface, all seven posters are completely different jokes. But when you look at what they're actually targeting, three of them point at the exact same thing— no accountability— and the rest point at things that are closely connected to it: a system that has collapsed, no answers from the government, the leak itself, and young people being ignored. The jokes are different. The demand is the same.

Table 4.4. Where each item borrowed its joke from

Figure	Borrowed from	What was borrowed
1	Marvel / Spider-Man	A moral line about power and responsibility
2	Meme riddle format	The set-up and punchline
3	Blinkit and Flipkart	The speed of a delivery app
4	Gen Z slang	The label ‘baddie’
5	The internet	The ‘404— page not found’ error
6	Dora the Explorer (Hindi dub)	Dora’s question to the audience
7	Sanitary pad ads	The promise of ‘leak protection’

4.5 Emerging Pattern (Figures 1–7)

Across the seven items analysed, four patterns appear. First, borrowed formats— Marvel, Dora, delivery apps, 404 pages, and pad advertisements— familiar culture carries the critique. Second, comparison as accusation— Blinkit and a sanitary pad outperform the State, and the absurdity becomes the argument. Third, reclaimed identity— ‘Baddies are not apolitical’ turns the ‘unserious’ label into a political one. Fourth, a single shared target— whatever the joke, every item points back to one demand: accountability.

4.6 Humor as Shield, Sword and Community

Looking at all seven together, humor seems to be doing three jobs at once. It is a **shield**— because it’s ‘just a joke’, it’s deniable and harder to censor, even though everyone knows it’s completely serious. It is a **sword**— it lets protestors say things formal protest language never could, like comparing the education system to a sanitary pad or a broken website. And it builds **community**— the moment of ‘you get it’ is itself a kind of solidarity. Shared laughter turns individual anger into something collective, and anyone can join in.

CHAPTER 5

FINDINGS, CONCLUSION AND SUGGESTIONS

5.1 Results and Findings

Based on the analysis of the 7 posters, these are the main findings:

1. None of the posters were ‘just jokes’. Every single one of the seven had a clear institutional target behind the humor.
2. Intertextuality, irony and parody were the most used devices (three items each). Most of the humor was borrowed from things Gen Z already knew— Marvel, Dora, Blinkit, the internet, ads.
3. Whatever the joke, the target was the same— accountability from the government and the NTA.
4. Almost every poster had a dual-layered audience. Gen Z got it instantly, which built solidarity, while officials and elders were left outside the joke— which itself shows the gap between the protestors and the institutions.
5. Humor let the protestors say things formal protest language can’t. It made the accusations short, shareable, low-risk and ‘deniable’, and allowed comparisons that would otherwise be called ‘improper’.
6. Anyone could take part. You don’t need policy knowledge to make or share a meme, so the protest was open to everyone.
7. The protest became part of everyday online life— 5 of the 7 posters were found on Pinterest, saved and shared like any other aesthetic post.
8. Gen Z took back its own image. ‘Baddies are not apolitical’ turned the ‘unserious’ stereotype into a political identity.

Table 5.1. Findings against the objectives

Objective	What was found
1. Document Gen Z protest language	7 posters collected from Instagram and Pinterest (June 6–July 25, 2026) and analysed in detail.
2. Identify rhetorical devices	Intertextuality, irony and parody (3 each), wordplay/pun (2), comparative satire, slang reclamation and dark humor (1 each).
3. Identify institutional targets	All seven point back to accountability-related failures of the government and the NTA.
4. Understand the audience	Mostly dual-layered— in-group solidarity, out-group left outside the joke.
5. Explain what humor made possible	Deniability, short and shareable messages, easy participation, and ‘improper’ comparisons.

5.2 Conclusion

This project started with one question— *what made irony and humor an effective register for political resistance in the NEET-UG 2026 protests, rather than undermining the protest’s seriousness?*

After analysing the seven posters, the answer is that the humor didn’t make the protest less serious— it is what carried it. Irony let the protestors say one thing and mean another, and left it to the in-group to complete the meaning. Parody and intertextuality borrowed things everyone already knew and turned them against the government. Wordplay and comparisons made the failure of the system look so absurd that it was almost impossible to defend. And slang like ‘baddie’ took the label that was used to dismiss Gen Z and made it political. All of this made the protest language short, shareable, deniable and open to everyone— which is exactly what formal protest language can’t be.

Each meme served as a tiny revolution. The memes, reels, slang and language of Gen Z were not decoration around the protest— they were a rhetorical mode of political resistance. The movement that started at Jantar Mantar on June 6, 2026 spread across the country, and on July 25, 2026 the Union Education Minister resigned. This project does not claim that memes alone made that happen, but it does show that humor was central to how this movement spoke, spread, and held together.

Gen Z has its own language of protest— ironic, visual, full of references, and completely serious underneath. The unserious generation showed up on the most serious topic, and it deserves to be taken seriously.

5.3 Recommendations and Suggestions

For the government and institutions

- Memes and humorous posters should be treated as real political expression, not as ‘disrespect’. Every joke analysed here has a very specific complaint in it.
- Exam security needs to be stronger, and students need clear and quick answers during a crisis— posters like the Blinkit one and the 404 one show that silence itself becomes the target.

For media and older generations

- Instead of brushing off Gen Z’s language, try to understand it. Getting the reference is the first step to getting the demand.

For educators

- Memes, protest posters and digital language can be studied in English literature and language classes— they are a living form of satire.

- Multimodal analysis can be used in classrooms to help students read media more critically.

For further research

- A bigger set of posters, along with reels, chants, speeches and the Cockroach Janta Party's online content, can be analysed in future work.
- A bigger collection of items could be studied to check if the same patterns hold for the whole movement.
- The NEET-UG 2026 protests can be compared with Gen Z protests in other countries.
- Interviews with protestors could show what they were actually thinking when they made these posters.

APPENDICES

Appendix A: The Corpus— List of Posters

All 7 posters that make up the corpus of this project are listed below with their sources.

No.	Platform	Source	Figure
1	Instagram	@p9xrider and @p9x_puneet_saxena	Figure 1
2	Instagram	@chief.of.shitposting	Figure 2
3	Pinterest	@yaashnaaaa	Figure 3
4	Pinterest	@Lyaaa	Figure 4
5	Pinterest	@FAGUN	Figure 5
6	Pinterest	@mydearnikes	Figure 6
7	Pinterest	@Spring potato	Figure 7

Appendix B: Questions Used to Analyse Each Item

1. What is on the poster/meme— the text, the image, the colours?
2. What rhetorical device is being used— satire, irony, parody, absurdism, intertextuality, wordplay, in-group reference, slang?
3. Which institutional failure is it targeting?
4. Who is the implied audience— who gets it (in-group) and who doesn't (out-group)?
5. Why did it work— what did the humor let it say that formal protest language couldn't?

Appendix C: Gen Z Words Used in This Project

Word	Meaning
Baddie	A confident, stylish young woman. Usually connected to fashion and Instagram aesthetics.
Brainrot	Absurd, repetitive, very-online meme content— or the feeling of having watched too much of it.
Error 404	The 'page not found' message on the internet. Used to say something doesn't exist.
Meme	An image, text or video format that people copy, change and share online.
Reel	A short vertical video on Instagram, usually with trending audio.
Shitposting	Posting deliberately absurd or low-effort jokes, usually ironically.
Out of syllabus	Student slang for something you were not at all prepared for.

PROGRESS REPORT

No.	Date	Work done
1	August 11, 2026	Topic finalised. Started collecting protest posters along with their sources.
2	August 15, 2026	Found the main article for the literature review— Hakoköngäs, Halmesvaara & Sakki (2020), ‘Persuasion Through Bitter Humor’.
3	August 20, 2026	Made the working skeleton— research question, thesis statement and chapter outline.
4	Late August 2026	Put together the key dates and timeline of the protest. Wrote the introduction, literature review and methodology.
5	August 28, 2026	Presented Progress Report 1 to the guide— context, research question, literature review, methodology and the first worked example (Spider-Man poster).
6	September 2026	Finalised the corpus at 7 posters. Finished the analysis of Figures 1–7 and the emerging pattern.
7	October 2026	Made the tables and graphs, wrote the findings, conclusion and suggestions, added references and appendices, and put the final report together.
